The First International Conference on Materials, Environment, Mechanical and Industrial Systems ICMEMIS'19 will be held at DJELFA University, Algeria, from June 29 to 30, 2019. The conference is organized in collaboration with the University of MEDEA and the University of DJELFA, Algeria.

This international conference on materials, environment, and industrial systems aims to improve the materials of mechanical systems in modern industry. Indeed, these systems have evolved considerably in recent decades by their durability, reliability and structures. This is one of the most important technological challenges for future innovations, which appears to be a determining factor for sustainable success in the industrial sector.

The main objective of ICMEMIS'19 is to bring together all potential participants; manufacturers, experts, researchers, academics, manufacturers and suppliers from several countries - to review the latest developments in these areas and exchange research ideas to explore challenges. The topics of interest include, but are not limited to, the following:

Theme A: Energetics, Fluid mechanics and Environment	Theme B: Structural and Material Engineering	Theme C: Industrial Engineering
Heat and mass transfer, Fluids dynamics, Renewable energy engineering, Optimization of energy systems.	Fracture and fatigue, Numerical modelling and optimization, Tribology, Seismic design in analysis of structures, Earthquake engineering, Geotechnical engineering, Durability, recycling and technological applications, Materials development and sustainability.	Modeling and control of rotating machinery, Acoustics and vibrations of rotating machines, Measurement and acquisition of vibrations, Diagnosis and prognosis of rotating machines, Reliability and availability of industrial systems.
